3750 Timberlake Drive Richfield, OH 44286 Employees benefit from an employee portal designed to work across smartphones, tablets, laptops, and desktops. The portal is easily customizable to represent your brand, including colors, custom background, and login screen. Employees have greater flexibility to access and update their own personal information from anywhere anytime.

## Improved Manager Experience

GMS Connect provides a powerful new manager interface with standardized role based user profiles to control access to specific fields, menus and data. With role-based permissions, training is simplified for managers who only must learn one system. Managers can access their own Employee Self Service screen from one place, no more remembering multiple usernames and emails.

When you sign in you will immediately see that the user experience has been streamlined and consolidated for maximum efficiency. With the new Favorites feature, you can create quick links to your most-used tasks.

# Quickly Find What You Need, With Improved Search

New search capabilities make it extremely easy for managers to find almost anything by typing just a few characters into the search box.

You can also apply filters to narrow your results before searching, filtering your results to only show employees, reports, or fields. To use filters, simply enter the corresponding filter letter, followed by the search term. Common filters are:

- a: Application window or menu item
- e: Employee name, id, etc.
- f: Field name
- r: Report name

#### Reporting

The new GMS Connect provides numerous pre-built reports with a wide range of customizable parameters, making it easier than ever to find the information you need. Reports are generated in real-time and are immediately available.

With Data Retriever, Managers can quickly access and report on employee data whenever they want. Additionally, Managers can save templated employee reports, making it easy to quickly access the same data the next time it's needed.
